

## Fix the Scrapy Shell Command

Run this in your **terminal** with the correct URL:

```
scrapy shell -s PLAYWRIGHT_BROWSER_TYPE=chromium  
"https://jiji.co.ke/houses-apartments-for-sale"
```

```
fetch("https://jiji.co.ke/houses-apartments-for-sale", meta={"playwright": True,  
"playwright_page_methods": [{"method": "wait_for_load_state", "args": ["networkidle"]}]})
```
